

APPLICATION NOTE NO. 13

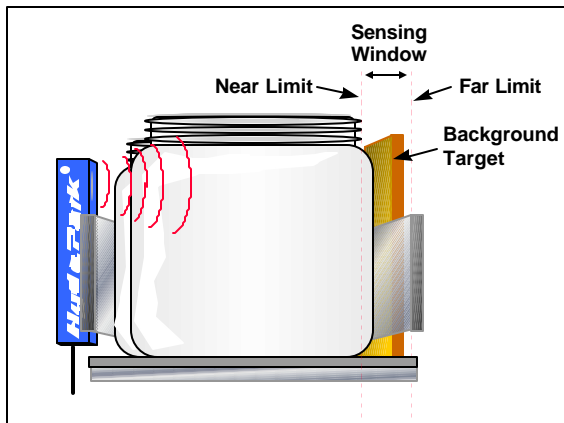

ARE YOU BETWEEN A ROCK AND A HARD SPOT FOR A COMPACT RELIABLE SENSOR?

APPLICATION:

Any conveyor application that has limited space for sensor installations.

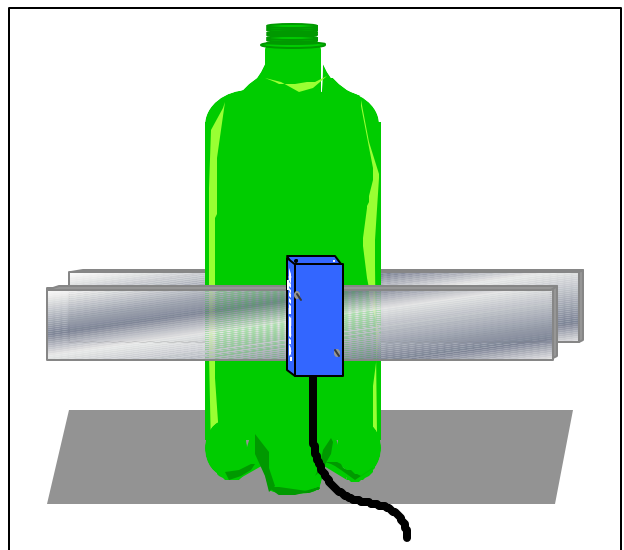

SOLUTION:

A New Flat Profile Ultrasonic Proximity or Thru-beam Style of Sensor.

SUPERPROX® SM600FP Flat Profile Series Proximity Sensor - For those applications that require a compact sensor for limited area mounting requirements, the new flat-profile, fixed-window, ultrasonic sensor is a possible solution.

MICROSONIC® SM800FP Flat Profile Series Thru-beam Sensor - Provides an effective across-the-line ultrasonic sensing technique, this new thru-beam sensor series is another possible solution for detecting objects within spans up to 100 cm (40").

As with all Hyde Park sensors, the flat profile style of sensors are unaffected by shape, size, material or color in the messiest of environments.
